De betekenis van het landsembleem:  
 The symbol consists of four crescents and a sword. The four crescents are meant to stand for the word Allah (there is indeed some resemblance to the Arabic writing of it). The five parts of the emblem symbolize the five pillars of Islam. Above the sword (central part) is a *tashdid* (looks a bit like a W). In Arabic writing this is used to double a letter, here it doubles the strength of the sword.

het zijn de kleuren van de vlag, maar in het wit staat nu een tekst ter gelegenheid van de herdenking van de islamitische revolutie
